 **HUVEPHARMA<sup>®</sup>**

B-Act® Buzz is a probiotic feed additive consisting of viable spores of a unique *Bacillus licheniformis* strain (DSM 28710). The unique product formulation is aimed at delivering the probiotic via the drinking water in the form of an effervescent tablet, improving ease-of-use.

## • CHARACTERISTICS

- ✦ The spores in **B-Act® Buzz** protect *Bacillus licheniformis* throughout the digestive tract, as well as in drinking water with low pH-values..
- ✦ Due to aerobic and anaerobic respiration of the bacteria, **B-Act® Buzz** exerts its positive effect throughout the whole intestinal tract.
- ✦ The effervescent **B-Act® Buzz** tablet dissolves rapidly in the drinking water, distributing the spores quickly and homogeneously throughout the water.

## • BENEFITS

**B-Act® Buzz** establishes and maintains a beneficial microbial population in the gut by:

- ✦ Direct antagonism against *Clostridium perfringens*.
- ✦ Creating a favorable environment for beneficial bacteria via competitive exclusion.

## • INDICATIONS FOR USE

- ✦ Inhibition of *Clostridium perfringens*
  - Prevention of enteritis
  - Reduction of dysbiosis
- ✦ Mitigation of secondary issues, including wet litter and lameness of bacterial origin
- ✦ Boosting general gut health

## • APPLICATION

- ✦ Use preventively, during periods of stress or in case of problems.
- ✦ **B-Act® Buzz** is compatible with antibiotics, coccidiostats and other feed additives.
- ✦ Safe for all species.
